

Diesel Generators

Quality generators using low harmonic distortion alternators, mounted in a powder coated heavy duty frame, which provides an attractive low maintenance solution to your power needs. Powered by genuine Yanmar, Honda & Hatz, the features include:

- Australian standard (AS2790) compliant
- Compact design roll frame, 3mm steel base plate, centre lift bar & rubber mounting system
- Superior electrical performance and power characteristics THD (Total Harmonic Distortion)
- Light weight without compromising strength
- 3 Phase
4/6.5kVA 2x15A 240V 1 x 10A 5 pin 415V
8/12.0kVA 2x15A 240V 1 x 20A 5 pin 415V

Diesel Generators are primary designed to operate between 60 to 100% load for extended periods of time. Diesel generators are a little more expensive compared with petrol generators, but are more fuel efficient.

Options include:

- WorkCover spec protection module (inc weatherproof outlets & earth leakage circuit breaker protection)
- 18 litre extended operation fuel tank
- Wheels & handle roll frame
- Earth stake kit
- Dry battery fitted with transport acid pack (electric start models)
