

K10360

The K10 LED Gives

ULTIMATE POWER • CONTROL • PERFORMANCE

Over 12,000lm output from three infinite varifocus heads

Whatever illumination your task requires:

- 360° area flood lighting
- Directional area flood lighting
- Long distance spot lighting
- Or a combination of all three!

360° area flood lighting

180° directional area flood lighting

What Is Unique About The K10?

One work light suitable for every task – no need to carry several products

Unique multi-function design covers every application from 360° area flood light to long distance spot/search light, and everything in between.

Integrated tripod system with 1.8m working height without needing to carry any additional equipment

Folding Stabilizer legs and quick deploy extensions poles integrated into the base of the K10.

Best in class usable light output for any remote lighting task

Using a special triple head design featuring the unique Ritelite Light Management System.

Always ready when you need it using the mobile charging option

The optional in-built fast 12-24V DC mobile charger means you can keep your K10 fully charged and ready for use even on the move and in between tasks.

Unrivalled performance to size/weight ratio delivers maximum performance in any remote application

Compact design, easy to carry, with highest light output efficiency, coupled with minimal space claim in your vehicle.

Lightweight Lithium battery option for increased portability – especially advantageous for use in difficult terrains e.g. mountain areas, or in emergency situations

Offers the same performance with a significant weight saving (5.45 kg) for ease of deployment over longer distances in extreme situations.

Power Functions

Light output can be dimmed from 8% to 150% and regulated as needed. Boost function to increase light output to 150% for detailed tasks where as much light as possible is required.

Flood and Spot lensing

The K10 is fitted with Ritelite's unique diffuser to enable users to switch between a wide flood beam or a focused spot beam as required or even a combination of both.

Each headlet can be switched between the different beam angles to enable the user to create their optimum light effect for the application and maximum flexibility.

Integrated tripod

The K10 comes with an integrated, quickly deployable tripod to allow the light head to be raised up to 1.8M high. This compact tripod solution ensures the K10 can be used in a variety of different applications without the need for additional equipment.

The K10 also has in built stabiliser legs to give enhanced stability on uneven surfaces.

Multi-charging options

The K10 charges from 12V, 24V & 240V supplies making it flexible around the customer's requirement. All units have battery monitoring software to monitor battery and charging status and battery levels are clearly indicated on the K10 light to indicate duration left before re-charge is required.

K10 SPECIFICATIONS

POWER	30W per light panel - 90W total max
LUMENS	Approx 12,000 lumens max
DURATION (10-100% SETTING)	3 - 40 hours (depending on brightness level)
HEIGHT	175mm
WIDTH	220mm (max with panels folded out)
DEPTH	100mm (max with panels folded out)
WEIGHT	12.65Kg (approx)

Adjusting Beam from Spot to Flood

Simply move the opaque slider up or down to adjust beam intensity.
