

6800W Petrol Powerlite Generator - PH080E10600-Solar Powered by Honda

Model - PH080E10600-Solar

Product Description

6,800W Petrol, Powerlite Generator, powered by a genuine Honda IGX390 intelligent single cylinder engine, for use where a two wire auto start / stop is required such as solar systems where the solar controller senses when the batteries are low when there is no sunshine.

Features include heavy duty roll frame with anti-vibration mounts, additional 18 litre long range fuel tank, engine starting battery and two wire start controller including a 240V battery charger to ensure that the starting battery is always ready for use when required.

The two wire start / stop will automatically start and stop the generator depending on the requirements of the solar batteries or at the closing of a voltage free contact if used for other applications.

Specifications

Industry rating	8 kVA
Real power	6800 watts
Engine	IGX390 Honda
Starting	Electric & Recoil
Phase	Single
Fuel	Petrol
Frame	Roll
Tank litres	24.5
Fuel litres per hour	3.5
Weight	70 kg
Outlets	1x10A & 1x15A
Dimensions (LxWxH mm)	760x500x540
